PROJECTS

Predictive Customer Flow Analysis Using Satellite Data

Analyzed peak footfall and traffic patterns for local tea stalls using satellite imagery and location data to support demand forecasting and site-selection decisions.

Smart Village Car Rental and Auto Booking System

Built a booking platform with real-time driver and vehicle availability tracking, streamlining local transport access in semi-urban and rural areas.

YouTube Comment Insight Engine

Used NLP and machine learning to classify and surface key viewer feedback from comments, helping creators identify actionable insights to improve content quality.

WorkerConnect: Service Marketplace Analytics Platform

Developed an analytics-driven marketplace connecting customers with plumbing, cleaning, and electrician service providers, featuring profiles, reviews, and real-time job-status tracking.

CERTIFICATIONS

- IBM SkillsBuild — Artificial Intelligence Fundamentals
- AWS Academy — Cloud Foundations
- AWS Academy — Data Engineering
- Google Cloud — AI Applications
- Google Cloud — Data Warehouse with BigQuery
- Cisco — Data Analytics Essentials
- ServiceNow Certified Implementation Specialist — Data Foundations

ACHIEVEMENTS

- Cleared the TCS National Qualifier Test (TCS NQT) and received the TCS Ninja Offer Letter
- Secured a Top 5 position in a National-Level Hackathon
- Organized and led a hackathon with 250+ participants
- Won 1st Prize in District-Level Designing Competition
- Achieved 3rd Prize in Business Idea Competition

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- **Head Boy (10th & 12th)** — Led student governance and coordinated 15+ institutional events with 500+ attendees
